

Konstantinos Passadis

A Brief Professional Overview

Hello, I'm Konstantinos Passadis, an experienced IT professional dedicated to designing and implementing multicloud and modern workspace solutions. My expertise lies in Azure, AWS, GCP, and Microsoft 365 architecture, fueled by a passion for digital transformation, cybersecurity, and continuous learning. I believe in maintaining a calm demeanor, constantly seeking new knowledge, and challenging limits with honesty, sincerity, and mutual trust.

Professional Skills and Expertise:

- **Digital Strategy and Transformation:** I have been instrumental in designing and architecting digital strategies to guide SMBs and Enterprise organizations through their digital transformation journeys.
- **Modern Workplace Solutions:** My engineering skills have been pivotal in creating modern workplace solutions that align with contemporary organizational needs.
- **Data AI and Infrastructure Solutions:** I specialize in architecting, designing, and deploying robust solutions across Cloud, Multi-cloud, and Hybrid Organizations, focusing on identity security, cost optimizations, migrations, and disaster recovery.
- **Cloud and Multicloud Frameworks:** My work includes delivering solutions and designs adhering to Cloud and Multicloud Adoption Frameworks, implementing Landing Zones and Tools.
- **Data Centers Management:** I have experience in designing, building, and managing data centers, ensuring data redundancy and high availability.
- **Cybersecurity and Data Protection:** Establishing and managing cybersecurity and data protection strategies are among my key competencies.
- **Azure DevOps:** I have designed and built Azure DevOps organizations and tools to streamline development and deployment processes.
- **End-to-End Solution Engineering:** My expertise includes engineering comprehensive solutions from conception through to delivery, including POCs and technical quotations.
- **Software Development Team Collaboration:** I provide architectural and design expertise to software development teams.
- **Technical Writing and Training:** I am adept at pre-sales technical writing and a certified trainer specializing in Azure, Microsoft 365, and Google Cloud services.

Organizational and Interpersonal Skills:

- **Team Management and Development:** I have experience in orchestrating and uplifting project teams, cultivated as a Technical Manager.
- **Strategic Global Perspective:** My engineering career has progressively honed a broad viewpoint and self-control.

- **Collaborative Leadership:** I champion collaboration by acknowledging competencies and positively reinforcing team members in managing projects.
- **Pressure Management:** I demonstrate the ability to maintain focus and drive results under pressure during high-demand critical projects.
- **Negotiation and Solution Planning:** My role as a Presales Engineer has honed my adept negotiation and adaptive planning abilities.
- **Inspirational Confidence:** I have established myself as persuasive and confidence-inspiring through demanding security projects.
- **Empathetic Interaction and Customer Relations:** Engaging empathetically with stakeholders and maintaining pleasant demeanor and constructive relationships are part of my skill set.
